PICTURE SIGNAL PROCESSING

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

RESPONSE UNDER 37 C.F.R. 1.111

This is in response to the Office Action mailed January 4, 2005, in which the Examiner has now rejected claims 1-4, 6-8 and 10 under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,897,716 to Drewery et al. Applicants acknowledge that the Examiner has allowed claims 12 and 13, and has found claims 5, 9 and 11 allowable over the prior art of record.

Applicants traverse the above rejection and offer the following explanation.

The Drewery et al. patent discloses a method and apparatus for adaptively displaying video signals in which the television receiver receives an incoming television signal as well as a movement information signal which is used by crossfade processors 118 and 120 to select between two different scanning standards.
